SKIN THERAPY AND PERMANENT MAKEUP

DEFY AGE, DEFINE BEAUTY.

When I started in my Medical Aesthetics Career 1980s, we had Retin-A and Glycolic Acid and that was about it. Today I am almost overwhelmed at the amount new products that promise to "turn back the hands of time". With 8000 new beauty products introduced into the market each year, I really want to help you put your hard earned money into products that are medically proven to reverse damage that has been done thru environmental stressors such as UV light, air pollution, ozone, and cigarette smoke. With almost 17 years experience and thousands of clients, I believe I am qualified to give you valuable advice when it comes to managing the health and integrity of your skin. It really is a passion of mine to have all of my clients with absolutely radiant skin.

More news: My friend Teresa Cadwallader, owner of Image Perfect Laser is working in our facility again! It is so good to have her back! We have a comprehensive age management program that we are very excited about using the IPL FotoFacial in conjunction with some very exciting new peels and outstanding medical grade skin care products. I hope you find this newsletter helpful.

Have a wonderful Holiday Season!

Your permanent beauty secret!

Join with the thousands of women who enjoy the beauty and ease of waking up with perfectly applied Eyeliner, Lip color and

Eyebrows! Permanent Make-Up is a revolutionary method of applying micro insertions of natural pigments into the dermal layer of the skin. This state of the art technique is medically proven and specifically

designed to be completely safe. I have been a Make-Up artist over 25 years. I can not put into words what a wonderful feeling it gives me to help people who don't feel 100% comfortable about how they are applying their make-up. Or, even better is to give those who have no eyebrows the illusion that they have gorgeous eyebrows. Then there is the beauty of doing Permanent Lip Color on those whose lips have faded significantly or who have extremely light eyelashes or

sometimes none at all the illusion that they do! Permanent Make-Up is a passion for me. I can hardly believe I have had mine almost 17 years now! I love the time it saves me! Please feel free to make a complimentary consultation and enjoy 10% off your eyeliner for mentioning this email! If you have been thinking about this for sometime now, I encourage you to move forward! I have yet to hear one of my clients say that they wish they had not waited so long!

Revitalize your skin with Neocutis.

It's what we've all been waiting for! I have found the "new generation" of growth factors. This new product was developed at the University Hospital of Lausanne in Switzerland. Research was done to discover why infants still in the womb, when operated on for various reasons, are born with no scarring. The answer is Processed Skin Cell Protiens, or PSP.

PSP is a natural skin care ingredient obtained directly from cultured skin cells. PSP mimics naturally what your body does for renewal and restoration. PSP energizes, nourishes and restores aging and sun-damaged skin cells by increasing the mitochondrial (mitochondria is the power house of the skin cell), activity of the cell and "tricks" older cells into behaving more like youthful cells.

They are highly effective, plus you get about 3 times as much product for about the same amount of money you were spending on TNS Recovery Complex! Most of my clients are aware that I've carried TNS for years and for the time it was the best product containing PSP – yet definitely pricey! I can hardly remember a time when the new and better version of anything was less money!

As high protein diets continue to be one of the best weight loss solutions, high protein skin care is the latest essential in anti-aging of the skin. Neocutis Bio-Restorative Cream, BioGel and Lumiere Eye Cream contain the latest anti-aging breakthrough PSP. Neocutis products provide the most complete and balanced combination of growth factors and cytokines currently available.

Daily application will:

- Improve skin tone and texture
- Reduce the appearance of fine lines and wrinkles
- Diminish the signs of sun damage and age spots
- Improve appearance and firmness
- Promote recovery and skin restoration after procedures

My all-time favorite product!

Peptides are the new in-demand ingredient in skin care products. Scientists have long recognized them as the building blocks of life. They are made up of a string of amino acids held together by tough bonds of nitrogen and carbon. Peptides penetrate the epidermis because of their molecular size. Acting as "messengers", topical peptides can send out signals to tell the receptor on the skin cells how they are to perform. The most effective peptide product I have found is Skin Therapy Peptide Mobilizer. It contains Matrixyl, just one of the 5 leading peptides found in this product. Matrixyl

is considered a must-use in anti-aging regimen products because of the proven capabilities in developing the dermis. Matrixyl can noticeably increase the skins thickness and improve its appearance. It is said to develop dermal components as no other topical ingredient has done before. I predict that you will be seeing the word "Peptides" in more and more over the counter products. You may think, "Why can't I use an over the counter multiple use product that is less expensive?" The truth is less expensive means lower amounts of the important ingredients.

Peptides are expensive ingredients to formulate, and the costs are passed on to the consumer. But they must be percentage specific in their formulation or they do not perform. Lower percentages in other products are simply "label dressing." Even when placed in ineffective percentages, legally they are able to be mentioned. StriVectin is an example of a less effective product that contains a lower percentage of Peptides. It was actually formulated by the same chemist as The Peptide Mobilizer. I have seen more of a difference in my client's skin who are using Peptide Mobilizer than any other product before. I encourage you to get yours today!

Advanced laser Services at Cosmeticare

Cosmeticare is pleased to welcome Teresa Cadwallader, RN, to our staff. Teresa is a Registered Nurse (RN) and laserologist. She is focused on both your safety and satisfaction at all times. As a Registered Nurse with a Bachelor of Science Degree, she's had extensive training and brings a high level of expertise in performing the following laser treatments:

Skin Rejuvenation and Pigment Lesion Removal

Our Skin Rejuvenation treatment, using an FDA-approved non-ablative laser, reduces wrinkles, increases collagen, minimizes scars, pore size, redness & sun damaged skin for a more vibrant youthful appearance for men & women. Unlike many other treatment methods, Laser Rejuvenation is a comfortable, non-ablative form of skin therapy. This means you will be able to see subtle yet consistent results after each treatment, without the unwanted side effects such as bruising or excessive skin irritation. Your therapy is performed in a relaxed, comfortable environment without the use of general or local anesthesia.

Laser Hair Removal

Many men and women feel uncomfortable with facial hair or hair on other areas of the body. Imagine a laser so fast, affordable and effective that it eliminates shaving, plucking, waxing, electrolysis and even razor bumps! Treatments safely remove unwanted body hair without damaging delicate skin. CosmetiCare offers the most advanced technology and medical staff to provide the best results.

Vein Reduction

Our laser allows us to treat a full range of vascular lesions from fine telangiectasia and diffusing redness, spider veins to the large deep reticular leg veins.
